From Recognition to Excellent!
Last year, Construction Equipment Group received the Caterpillar® Supplier Excellence Recognition. This year, we've taken it one step further.

Construction Equipment Group AS has now been upgraded to Excellent – the highest level in Caterpillar Inc. 's supplier recognition programme.

As a supplier of buckets for Cat® machines, this recognition means a great deal to us. It reflects our performance in quality, delivery precision and competitiveness – and the consistent work behind every delivery.

The certificate was presented at Caterpillar's Distribution Center in Grimbergen, Belgium, where Jan Pustul, Helle Nisted and Jørgen B. Randa from our International Team were there to receive it on behalf of CEG.

But reaching this level is the result of work across our entire organisation. From development and production to sales, logistics and support – every part of CEG contributes to the quality and consistency behind every delivery.

A big thank you to everyone across CEG for the dedication and teamwork that has brought us here – and to Caterpillar for the recognition, continued cooperation, and warm welcome in Grimbergen.

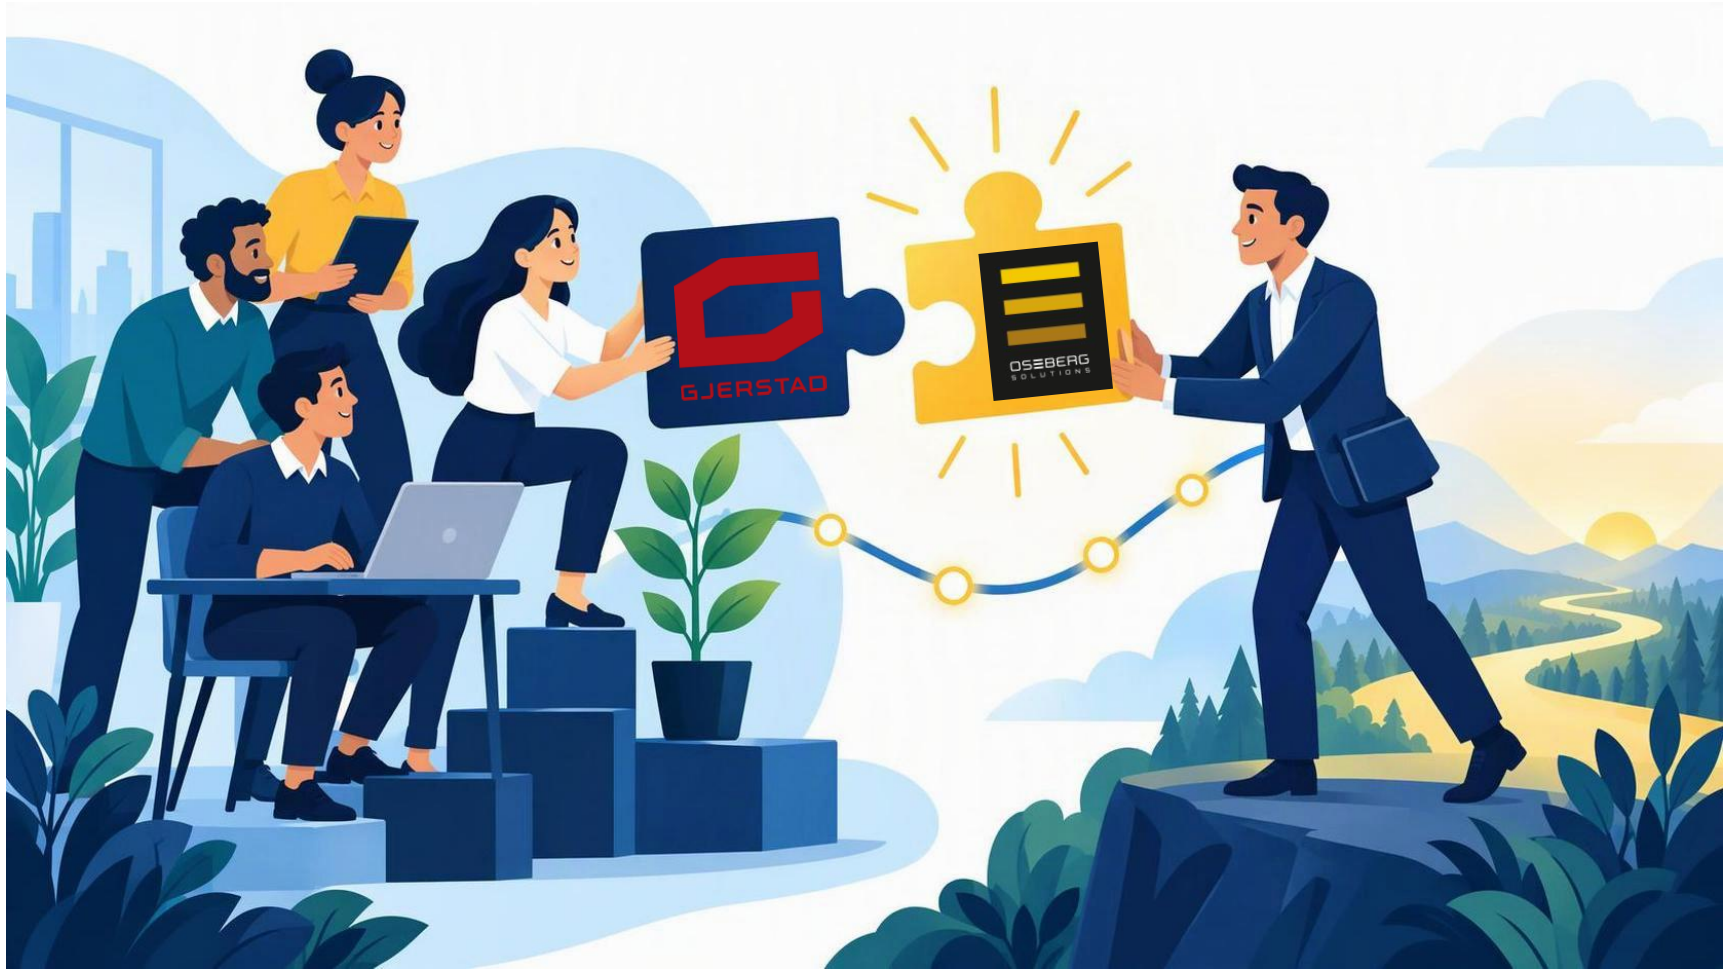

From Recognition to Excellent. And we keep moving forward. 💪
